Subject Index of Volume 77

Absorption coefficient
determination of the absorption coefficient of perfluoropropanoic anhydride at 147 nm, 93
Adsorption
interrelationships between pollutant concentration, extent of adsorption, TiO_2-sensitized removal, photon flux and levels of electron or hole trapping additives. 1. Aqueous monochlorophenol–TiO_2(P25) suspensions, 255
Alkali-metal-cation-exchanged zeolites
enhancement of the phosphorescence yields of xanthone included in alkali-metal-cation-exchanged zeolites — external heavy-atom effect on the singlet–triplet transitions, 183
Anthracene colloid
photoextraction of silver from aqueous solution using anthracene colloid, 265
Aromatic ketones
UV–vis absorption studies of singlet to triplet intersystem crossing rates of aromatic ketones: effects of molecular geometry, 109
5-Aryl moiety
role of the 5-aryl moiety in the photophysics of triaryl-2-pyrazolines, 133

Benzene ring
intramolecular *meta* photocycloaddition of vinyl ethers to the benzene ring, 161
1,2-bis(9-acetoxy-10-anthryl)-ethane
fluorescence spectra and geometry of 1,2-bis(9-acetoxy-10-anthryl)-ethane, 119

Carboxylated zinc phthalocyanines
carboxylated zinc phthalocyanines. III. Quenching of excited singlet and triplet states by quinones in CTAC micelles, 41
Cationic dyes
counter-ion effects in cationic dyes: photophysics and photochemistry of a macrocyclic dimer of dimethylindocarbocyanine, 237
Cationic photoinitiators
iron–arene complexes as free radical and cationic photoinitiators, 269
CF_3I
thermal effects in the IR multiphoton photolysis of CF_3I in the presence of isobutane, 97
Chalcone derivatives
a study on the spectroscopy and photophysical behaviour of chalcone derivatives, 127
$CHCl_3$ electronic spectra
photochemical reaction of full-aromatic β-carbolines in halomethanes. 2. $CHCl_3$: electronic spectra and kinetics, 149
Chromo fluoroionophores
styrylbenzodiazinones. 3. Chromo- and fluoroionophores derived from monoaza-15-crown-5. Photophysical and complexing properties, 217

Controlled-pore glasses
fluorescence study of pyrene chemically bound to controlled-pore glasses, 69
Counter-ion effects
counter-ion effects in cationic dyes: photophysics and photochemistry of a macrocyclic dimer of dimethylindocarbocyanine, 237
CTAC micelles
carboxylated zinc phthalocyanines. III. Quenching of excited singlet and triplet states by quinones in CTAC micelles, 41

Denitrogen
an investigation of a putative photoreaction of dinitrogen with ferrofluid, 173
Dimethylindocarbocyanine
counter-ion effects in cationic dyes: photophysics and photochemistry of a macrocyclic dimer of dimethylindocarbocyanine, 237
Dimethylsilylene
a photochemical route to 1-oxa-2-sila-4-cyclopentenes, 169
Dioxolenes
spectral and photochemical behaviour of newly synthesized 2,2′-dipyridylamine complexes of Pt(II) and Pd(II) with various dioxolenes, 141
Diphenyl isobenzofuran
spectral properties and absolute determination of singlet oxygen production yield by naphthaloporphyrins, 23
2,2′-Dipyridylamine
spectral and photochemical behaviour of newly synthesized 2,2′-dipyridylamine complexes of Pt(II) and Pd(II) with various dioxolenes, 141

Electron donors
photoelectrochemical study of xanthene dye–electron donor aqueous solutions for solar-induced hydrogen production, 37
Electronic spectra
a condensed thiadiazolo-pyrimidine as a new efficient fluorophore. Theoretical and experimental investigation of the electronic spectra and photophysics, 227
Ethanolamine
visible-light generation of hydrogen from hydrogen sulphide in aqueous solutions of ethanolamines containing vanadium sulphide dispersions, 249
Ethylene glycol
photoinduced hydrogen production from an aqueous solution of ethylene glycol over ultrafine gold supported on TiO_2, 59
Excited states
the investigation of non-radiative deactivation of excited states in thin films by laser-induced opto-acoustic calorimetry, 103
Exterplex intermediate
exterplex intermediate in the photodimerization of *N*-vinylcarbazole, 17

Ferrofluid
an investigation of a putative photoreaction of dinitrogen with ferrofluid, 173
Fluorescence
fluorescence study of pyrene chemically bound to controlled-pore glasses, 69
quenching of fluorescence in a series of covalently linked porphyrin–dinitrobenzene compounds, 189
Fluorescence spectra
fluorescence spectra and geometry of 1,2-bis(9-acetoxy-10-anthryl)-ethane, 119
Fluorescence spectroscopy
spectral properties and absolute determination of singlet oxygen production yield by naphthaloporphyrins, 23
Fluorescent whitening agents
a study of the photodegradation of fluorescent whitening agents applied to wool, using real-time fluorescence spectroscopy, 277
Fluorophore
a condensed thiadiazolo-pyrimidine as a new efficient fluorophore. Theoretical and experimental investigation of the electronic spectra and photophysics, 227
Free radical
iron–arene complexes as free radical and cationic photoinitiators, 269
Full-aromatic β-carbolines
photochemical reaction of full-aromatic β-carbolines in halomethanes. 2. $CHCl_3$: electronic spectra and kinetics, 149

Gold
photoinduced hydrogen production from an aqueous solution of ethylene glycol over ultrafine gold supported on TiO_2, 59

Halomethanes
photochemical reaction of full-aromatic β-carbolines in halomethanes. 2. $CHCl_3$: electronic spectra and kinetics, 149
Hydrogen
visible-light generation of hydrogen from hydrogen sulphide in aqueous solutions of ethanolamines containing vanadium sulphide dispersions, 249
Hydrogen sulphide
visible-light generation of hydrogen from hydrogen sulphide in aqueous solutions of ethanolamines containing vanadium sulphide dispersions, 249

Intramolecular transfer
preparation and characterization of bisviologen-linked porphyrin and bisviologen-linked zinc porphyrin, 29
IR multiphoton photolysis
thermal effects in the IR multiphoton photolysis of CF_3I in the presence of isobutane, 97
Iron–arene complexes
iron–arene complexes as free radical and cationic photoinitiators, 269
Isobutane
thermal effects in the IR multiphoton photolysis of CF_3I in the presence of isobutane, 97

Kinetics
laser-initiated polymerization, 1
photochemical reaction of full-aromatic β-carbolines in halomethanes. 2. $CHCl_3$: electronic spectra and kinetics, 149
kinetics of multistep photoinitiated electron transfer reactions in a molecular triad, 207

Laser-induced opto-acoustic calorimetry
the investigation of non-radiative deactivation of excited states in thin films by laser-induced opto-acoustic calorimetry, 103

Macrocyclic dimer
counter-ion effects in cationic dyes: photophysics and photochemistry of a macrocyclic dimer of dimethylindocarbocyanine, 237
Micelles
properties of differently charged micelles containing rose bengal: application in photosensitization studies, 49
Molecular triad
kinetics of multistep photoinitiated electron transfer reactions in a molecular triad, 207
Molecular weight distribution
laser-initiated polymerization, 1
Monochlorophenol
interrelationships between pollutant concentration, extent of adsorption, TiO_2-sensitized removal, photon flux and levels of electron or hole trapping additives. 1. Aqueous monochlorophenol–TiO_2(P25) suspensions, 255
Monoaza-15-crown-5
styrylbenzodiazinones. 3. Chromo- and fluoroionophores derived from monoaza-15-crown-5. Photophysical and complexing properties, 217
Multi-photon absorption
laser-initiated polymerization, 1

Na_2CO_3 addition
effect of Na_2CO_3 addition on photocatalytic decomposition of liquid water over various semiconductor catalysts, 243
Non-radiative deactivation
the investigation of non-radiative deactivation of excited states in thin films by laser-induced opto-acoustic calorimetry, 103
N-vinylcarbazole
exterplex intermediate in the photodimerization of *N*-vinylcarbazole, 17

1-Oxa-2-sila-4-cyclopentenes
a photochemical route to 1-oxa-2-sila-4-cyclopentenes, 169
Oxidation
photocatalytic degradation of wastewater pollutants. Titanium-dioxide-mediated oxidation of polynuclear aromatic hydrocarbons, 83

Pd(II)
spectral and photochemical behaviour of newly synthesized 2,2′-dipyridylamine complexes of Pt(II) and Pd(II) with various dioxolenes, 141
Perfluoropropanoic anhydride
determination of the absorption coefficient of perfluoropropanoic anhydride at 147 nm, 93
Phosphorescence yields
enhancement of the phosphorescence yields of xanthone included in alkali-metal-cation-exchanged zeolites — external heavy-atom effect on the singlet–triplet transitions, 183

Photocatalytic decomposition
effect of Na_2CO_3 addition on photocatalytic decomposition of liquid water over various semiconductor catalysts, 243
Photocatalytic degradation
photocatalytic degradation of wastewater pollutants. Titanium-dioxide-mediated oxidation of polynuclear aromatic hydrocarbons, 83
Photochemical reaction
photochemical reaction of full-aromatic β-carbolines in halomethanes. 2. $CHCl_3$: electronic spectra and kinetics, 149
Photochemistry kinetics
spectral properties and absolute determination of singlet oxygen production yield by naphthaloporphyrins, 23
Photochromism
photochromism of undercooled melts of spirooxazines, 201
Photocycloaddition
intramolecular *meta* photocycloaddition of vinyl ethers to the benzene ring, 161
Photodegradation
a study of the photodegradation of fluorescent whitening agents applied to wool, using real-time fluorescence spectroscopy, 277
Photodimerization
exterplex intermediate in the photodimerization of *N*-vinylcarbazole, 17
Photoextraction
photoextraction of silver from aqueous solution using anthracene colloid, 265
Photoinduced hydrogen production
photoinduced hydrogen production from an aqueous solution of ethylene glycol over ultrafine gold supported on TiO_2, 59
Photoinitiated electron transfer reactions
kinetics of multistep photoinitiated electron transfer reactions in a molecular triad, 207
Photon flux
interrelationships between pollutant concentration, extent of adsorption, TiO_2-sensitized removal, photon flux and levels of electron or hole trapping additives. 1. Aqueous monochlorophenol–TiO_2(P25) suspensions, 255
Photophysical behaviour
a study on the spectroscopy and photophysical behaviour of chalcone derivatives, 127
Photosensitization
spectral properties and absolute determination of singlet oxygen production yield by naphthaloporphyrins, 23
properties of differently charged micelles containing rose bengal: application in photosensitization studies, 49
Pollutant
interrelationships between pollutant concentration, extent of adsorption, TiO_2-sensitized removal, photon flux and levels of electron or hole trapping additives. 1. Aqueous monochlorophenol–TiO_2(P25) suspensions, 255
Polymerization
laser-initiated polymerization, 1
Porphyrin
preparation and characterization of bisviologen-linked porphyrin and bisviologen-linked zinc porphyrin, 29
Porphyrin–dinitrobenzene
quenching of fluorescence in a series of covalently linked porphyrin–dinitrobenzene compounds, 189
Pt(II)
spectral and photochemical behaviour of newly synthesized 2,2′-dipyridylamine complexes of Pt(II) and Pd(II) with various dioxolenes, 141
Pulsed-laser
laser-initiated polymerization, 1
Putative photoreaction
an investigation of a putative photoreaction of dinitrogen with ferrofluid, 173
Pyrene
fluorescence study of pyrene chemically bound to controlled-pore glasses, 69

Quenching
carboxylated zinc phthalocyanines. III. Quenching of excited singlet and triplet states by quinones in CTAC micelles, 41
quenching of fluorescence in a series of covalently linked porphyrin–dinitrobenzene compounds, 189
Quinhydrones
steady state and transient absorption spectra of quinhydrones, 9
Quinones
carboxylated zinc phthalocyanines. III. Quenching of excited singlet and triplet states by quinones in CTAC micelles, 41

Real-time fluorescence spectroscopy
a study of the photodegradation of fluorescent whitening agents applied to wool, using real-time fluorescence spectroscopy, 277
Rose bengal
properties of differently charged micelles containing rose bengal: application in photosensitization studies, 49

Semiconductor catalysts
effect of Na_2CO_3 addition on photocatalytic decomposition of liquid water over various semiconductor catalysts, 243
Silver
photoextraction of silver from aqueous solution using anthracene colloid, 265
Singlet
UV–vis absorption studies of singlet to triplet intersystem crossing rates of aromatic ketones: effects of molecular geometry, 109
singlet–triplet transitions
enhancement of the phosphorescence yields of xanthone included in alkali-metal-cation-exchanged zeolites – external heavy-atom effect on the singlet–triplet transitions, 183
Solar-induced hydrogen production
photoelectrochemical study of xanthene dye–electron donor aqueous solutions for solar-induced hydrogen production, 37
Spectroscopy
a study on the spectroscopy and photophysical behaviour of chalcone derivatives, 127
Spirooxazines
photochromism of undercooled melts of spirooxazines, 201
Steady state absorption spectra
steady state and transient absorption spectra of quinhydrones, 9

Styrylbenzodiazinones
styrylbenzodiazinones. 3. Chromo- and fluoroionophores derived from monoaza-15-crown-5. Photophysical and complexing properties, 217
Sulphide
visible-light generation of hydrogen from hydrogen sulphide in aqueous solutions of ethanolamines containing vanadium sulphide dispersions, 249

Thermal effects
thermal effects in the IR multiphoton photolysis of CF_3I in the presence of isobutane, 97
Thiadiazolo-pyrimidine
a condensed thiadiazolo-pyrimidine as a new efficient fluorophore. Theoretical and experimental investigation of the electronic spectra and photophysics, 227
TiO_2
photoinduced hydrogen production from an aqueous solution of ethylene glycol over ultrafine gold supported on TiO_2, 59
TiO_2(P25)
interrelationships between pollutant concentration, extent of adsorption, TiO_2-sensitized removal, photon flux and levels of electron or hole trapping additives. 1. Aqueous monochlorophenol–TiO_2(P25) suspensions, 255
TiO_2-sensitized removal
interrelationships between pollutant concentration, extent of adsorption, TiO_2-sensitized removal, photon flux and levels of electron or hole trapping additives. 1. Aqueous monochlorophenol–TiO_2(P25) suspensions, 255
Titanium dioxide
photocatalytic degradation of wastewater pollutants. Titanium-dioxide-mediated oxidation of polynuclear aromatic hydrocarbons, 83
Transient absorption spectra
steady state and transient absorption spectra of quinhydrones, 9
Triaryl-2-pyrazolines
role of the 5-aryl moiety in the photophysics of triaryl-2-pyrazolines, 133
Triplet intersystem crossing rates
UV–vis absorption studies of singlet to triplet intersystem crossing rates of aromatic ketones: effects of molecular geometry, 109

α,β-Unsaturated ketones
a photochemical route to 1-oxa-2-sila-4-cyclopentenes, 169
UV–vis absorption
UV–vis absorption studies of singlet to triplet intersystem crossing rates of aromatic ketones: effects of molecular geometry, 109

Vanadium
visible-light generation of hydrogen from hydrogen sulphide in aqueous solutions of ethanolamines containing vanadium sulphide dispersions, 249
Vinyl ethers
intramolecular *meta* photocycloaddition of vinyl ethers to the benzene ring, 161
Visible-light generation
visible-light generation of hydrogen from hydrogen sulphide in aqueous solutions of ethanolamines containing vanadium sulphide dispersions, 249

Wastewater pollutants
photocatalytic degradation of wastewater pollutants. Titanium-dioxide-mediated oxidation of polynuclear aromatic hydrocarbons, 83
Wool
a study of the photodegradation of fluorescent whitening agents applied to wool, using real-time fluorescence spectroscopy, 277

Xanthene dyes
photoelectrochemical study of xanthene dye–electron donor aqueous solutions for solar-induced hydrogen production, 37
Xanthone
enhancement of the phosphorescence yields of xanthone included in alkali-metal-cation-exchanged zeolites — external heavy-atom effect on the singlet–triplet transitions, 183
